Funding

The research presented in this article was funded by the European Research Council under the European Union's Seventh Framework Programme (FP7/2007-2013)/ERC grant agreement no 337673, and supported by the National Institute of Developmental Psychiatry for Children and Adolescent (INPD) – Grants: CNPq 465550/2014-2 and FAPESP 2014/50917-0.

Ethics

This study was approved by Comitê de Ética em Pesquisa da Universidade Federal de São Paulo - CAAE 06457219.9.0000.5505 and Comitê de Ética do Hospital de Clínicas de Porto Alegre - CAAE 06457219.9.3001.5327. Title of study: APPLAUSE: Precusores de transtornos psiquiátricos e Uso de Serviços na Adolescência: um Estudo Longitudinal

Conflict of interest

Sara Evans-Lacko received consulting fees from Lundbeck unrelated to this work. Luis Augusto Rohde has received grant or research support from, served as a consultant to, and served on the speakers' bureau of Eli Lilly and Co., Janssen, Medice, Novartis and Shire. The ADHD and Juvenile Bipolar Disorder Outpatient Programs chaired by Dr Rohde have received unrestricted educational and research support from the following pharmaceutical companies: Eli Lilly and Co., Janssen, Novartis, and Shire. Dr Rohde has received authorship royalties from Oxford Press and ArtMed and travel grants from Shire to take part in the 2018 APA and from Novartis to take part of the 2015 WFADHD congresses

Acknowledgements

The authors are thankful to all young people and caregivers who participated in the study. We are also thankful to all members of the research team who diligently carried out the data collection. The authors are also thankful to the staff of *Análise Soluções em Estatística* for helping coordinate the fieldwork and data processing.

Author contribution:

CP and CZ translated the original scale into Brazilian Portuguese; WR, PG and SEL conceived the manuscript; WR, PG, MH, AV and GS conceived the statistical modelling; WR, MH and AV ran the statistical analyses; WR and PG wrote the first version of the manuscript; SEL supervised the writing-up of the manuscript; CP, PP, JM, LR, EM, RB and GS revised the manuscript and contributed with the discussion of the results. All authors revised and approved the final version of the manuscript.

Access to underlying material related to this paper: Any underlying research material related to this paper can be accessed upon request to Dr Sara Evans-Lacko through the email s.evans-lacko@lse.ac.uk
