

Supplemental Annex: Schedules of Survey Questions

This Annex lists the full schedule of survey questions for all three surveys administered during the first national lockdown in Aotearoa New Zealand. The surveys contained a mixture of quantitative questions and open-ended qualitative questions in which respondents could freely describe their thoughts.

The analysis in this article draws on answers to the open-ended qualitative questions, which have been identified with asterisks and italicised in the schedules outlined below. We have also listed the quantitative questions in the survey so that readers can appreciate the context in which the open-ended questions were asked. However, for reasons of space – and since these answers do not directly inform our arguments in this article - we have not provided the full range of possible answers available for each of these questions.

Survey items to which respondents were able to respond are listed in the schedules with a Q – e.g. 'Q1.1'. Survey items that did not invite a response (e.g. information slides; framing remarks) are listed in the schedules with an S, e.g. 'S.1.1'.

Readers who would like any further information about the surveys should contact Dr Nicholas J. Long, Department of Anthropology, London School of Economics and Political Science – email N.J.Long@lse.ac.uk
