

<b>Delivery type</b>	<b>All</b>	<b>Good news</b>	<b>Bad news</b>	<b>Neutral</b>
Number of deliveries (%)	105 (100%)	46 (44%)	26 (25%)	33 (31%)
Mean weight change in Kg *	-4.49 (-6.04 to -2.95)	-4.78 (95% CI - 7.52 to -2.04)	-5.93 (95% CI - 8.25 to -3.61)	-2.93 (95% CI - 5.63 to -0.22)
Difference in weight change, versus neutral*	-	-1.85 (95% CI - 5.27 to 1.56)	-3.00 (95% CI - 7.11 to 1.11)	Baseline
Difference in weight change, versus bad news*	-	1.15 (95% CI -2.67 to 4.97)	Baseline	3.00 (95% CI -1.11 to 7.11)

Supplementary table 5 – Weight change in those participants who attended the weight loss programme.

Analysis using inverse probability weighting for missingness, adjusted for sex, ethnicity, age, weight at baseline, IMD score, with a mixed effects model with practice as a random effects term.

Weight changes measured at 12 months from baseline.

\*Marginal predicted mean
