

EU Kids Online III

A Thematic Network to Stimulate and Coordinate Investigation into the Use of New Media by Children

This report is Deliverable D1.5C

(Third Annual Progress Report, to cover the period from 01/11/13 to 31/12/14)

The EU Kids Online network
(for participants, see Annex 1)

Funded by the European Commission's Safer Internet Programme,
2011-14
(Contract number: SIP-2010-TN-4201001)

November 2014

The *EU Kids Online* network has been funded by the European Commission Safer Internet Programme in three successive phases of work from 2006-14 to enhance knowledge of children's and parents' experiences and practices regarding risky and safer use of the internet and new online technologies.

As a major part of its activities, *EU Kids Online* conducted a face-to-face, in-home survey during 2010 of 25,000 9- to 16-year-old internet users and their parents in 25 countries, using a stratified random sample and self-completion methods for sensitive questions.

Now including researchers and stakeholders from 33 countries in Europe and beyond, the network continues to analyse and update the evidence base to inform policy.

For all reports, findings and technical survey information, as well as full details of national partners, please visit www.eukidsonline.net

1. Introduction

1.1 Overview

EU Kids Online III is a thematic network coordinated by Professor Sonia Livingstone and Dr Leslie Haddon at the Department of Media and Communications, London School of Economics and Political Science (LSE). It is funded by the European Commission (EC) Safer Internet Programme in order to coordinate and stimulate investigation into the way children use new media, with a particular focus on evidence regarding the conditions that shape online risk and safety (see www.eukidsonline.net).

In its *first phase* (2006-09), as a thematic network of 21 countries, EU Kids Online identified and critically evaluated the findings of nearly 400 research studies, drawing substantive, methodological and policy-relevant conclusions.

In its *second phase* (2009-11), as a knowledge enhancement project across 25 countries, the network surveyed children and parents to produce original, rigorous data on their internet use, risk experiences and safety mediation.

In its present, *third phase* (2011-14), the EU Kids Online network has provided a focal point for timely findings and critical analyses of new media uses and associated risks among children across Europe, drawing on these to sustain an active dialogue with stakeholders about priority areas of concern for children's online safety.

- Specifically, the network has *widened* its work by including all member states, by undertaking international comparisons with selected findings from countries outside the EC, and extending its engagement – both proactively and responsively – with policy stakeholders and internet safety initiatives.
- It has *deepened* its work through new and targeted hypothesis testing of the pan-European dataset to strengthen insights into *the risk environment and strategies of safety mediation*, by testing new and innovative research methodologies for the nature, meaning and consequences of children's online risk experiences, and conducting longitudinal comparisons of findings where available over time.
- Last, it has *updated* its work through a rolling programme to maintain the online database of available findings, and by producing timely updates on the latest knowledge about new and emerging issues – for example, social networking, mobile platforms, privacy, personal data protection, safety and awareness-raising practices in schools, digital literacy and citizenship, geo-location services, and so forth.

All members are listed by country in Annex 1.

1.2 Work packages

The project has been organised into six work packages (WPs) that address the overall aim and objectives of the project.

WP1: Project management and evaluation

- To ensure that objectives, deadlines and quality standards are met, through the establishment of effective and flexible progress monitoring, assessment and quality control procedures.
- To sustain and encourage a dynamic research network engaged in active dialogue with relevant stakeholders, benefiting from ongoing projects internationally, and stimulating new research.

WP2: European evidence base

- To identify recent evidence about children's use of new media across Europe, in each member state and other participating countries, all coded and entered into an online public database.
- To evaluate the quality of the evidence base, promoting high-quality findings, identifying significant weaknesses in the evidence base, and reporting on trends in three annual reviews.
- To reflect on methodological good practice for research on children's internet use, including lessons from EU Kids Online II, and to promote these online as Frequently Asked Questions.

WP3: Hypotheses and comparisons

- To test a series of hypotheses (theory-led and policy-led) and comparisons (e.g. to explore regional groupings) in the EU Kids Online II dataset, resulting in short reports and full articles.
- To develop and report on bilateral comparisons of European findings and those from directly parallel (e.g. Russia) or similar projects (e.g. USA), to understand online risk.
- To develop and report on longitudinal comparisons of EU Kids Online findings and those from previous surveys (e.g. SAFT, Eurobarometer), to understand time trends and changes.

WP4: Meanings of risk for children

- To identify and stimulate the use of innovative qualitative methods for exploring difficult contextual and ethical issues that arise when researching children's understandings of and responses to online risk.
- To explore the meanings of risk for children, drawing on innovative methods where possible, to demonstrate the value of such approaches and to explore their potential for comparable findings.

WP5: Dissemination of project results

- To disseminate project results within national, European and international research forums, thereby promoting existing research and stimulating new research on children's new media use.
- To disseminate project results among national, European and international stakeholders so as to maximise the value of existing research and to support the growth of evidence-based policy.

WP6: Policy recommendations

- To monitor emerging issues and debates in internet safety policy-making, at both the national and international level.
- To highlight areas of interest arising from EU Kids Online research for the safety awareness policy community (with WP5).
- To formulate policy recommendations in conjunction with outcomes of other work packages (WP3 and WP4).
- To assess national policy responses to internet opportunities and risks as identified by EU Kids Online.
- To contribute to policy discussion at a European and international level.

2. The report

2.1 Report structure

- This report is based on the work of the whole EU Kids Online network of 33 countries as well as the International Advisory Panel (see Annex 1 for a list of all members).
- This third and final annual report is organised in two ways. First, we report on activities by date, noting key activities and events in accordance with the project timeline.
- Second, we summarise activities by WP, noting progress and any issues arising for each.
- The annexes provide additional information (meeting agendas and participants, lists of contacts and dissemination activities, etc.) as appropriate.

2.2 Report on activities by date

November 2013-January 2014 (T25-27)

- The short report *Risks and safety on the internet: Comparing Brazilian and European findings* was published.
- Teams continued preparing short reports for WP3.
- Presentations of the EU Kids Online III research plans were made at conferences.

5th workshop, Reykjavik, 17-18 January 2014 (T27)

(See Annexes 3 and 4)

- Progress was reviewed.
- WP3 and WP4 held sessions in parallel on 17 January.
- Þorðjörn Broddason spoke about *Children's media use: The long-term perspective*.
- Uwe Hasebrink spoke about *Challenges of longitudinal research – lessons learnt*.
- Sonia Livingstone talked about *Cross-cultural studies: Insights and challenges from the EU Kids Online experience*.
- WP2, WP4 and WP6 meetings occupied the morning of 18 January.
- Brian O'Neill spoke about Report D6.3, *Policy influences and country clusters*.
- Leslie Haddon led a discussion of website and end events for WP5.
- There was a discussion of future research after EU Kids Online III.
- There were reports from WP2, WP3, WP4, WP5 and WP6.
- Forward planning meeting. Activities, plans and deadlines for work for the six months ahead were reviewed and agreed.
- During the workshop national team members were videoed describing the key findings for their own countries in English and in their own national languages.

5th Management Group Meeting, Reykjavik, 18 January 2014 (T27)

(See Annex 5)

- Progress was reviewed.
- The future of EU Kids Online after November 2014 was discussed, outlining various options.

February-June 2014 (T28-T32)

- The third (Reykjavik) workshop minutes were circulated.
- The short report *Preventive measures: How youngsters avoid online risks* was published.
- WP3 members continued to work on other short reports.
- The coordinator evaluated the state of the project.
- Deliverable D4.2, *The meaning of online problematic situations for children: Results of qualitative cross-cultural investigation in nine European countries*, was published.
- New studies were added to the evidence database.
- New software was developed at LSE for the interface to edit entries on the evidence database.
- The third sixth-monthly report, D1.3B, was submitted to the EC.

6th workshop, Milan, 19-20 June 2014 (T32)

(See Annexes 6 and 7)

- Progress was reviewed.
- There was an updated report on the database.
- The qualitative results from EU Kids Online and the first results from Net Children Go Mobile were reported, and Michael Drier was the discussant in response.
- WP3, WP4 and WP6 had meetings.
- Stephane Chaudron led a session on *Researching very young children and e-safety*.
- Stephane Chaudron led a plenary on *ICT innovation: Emerging threats and opportunities for children*, and Janice Richardson acted as discussant.
- Janis Wolak led a plenary on *New risk categories* with Elisabeth Staksrud as discussant.
- WP2 and WP4 had meetings to discuss methodological toolkits.
- There was a session on media literacy/education.
- There was a discussion of future plans for the EU Kids Online Network.
- National teams gave 2-3 minute accounts of highlights, important results and key project research/ policy outcomes.
- Forward planning meeting. Activities, plans and deadlines for work for the four months ahead were reviewed and agreed.
- During the workshop more national team members were videoed describing the key findings for their own countries in English and in their own national languages.

6th Management Group Meeting, Milan, 19-20 June 2014 (T32)

(See Annex 8)

- Progress was reviewed.
- There was further discussion of future plans for the EU Kids Online Network.

June-October 2014 (T32-T36)

- The short report *Children's online experiences in socially disadvantaged families: European evidence and policy recommendations* was published.
- Deliverable D6.4 *Final recommendations for policy* was published.
- The video wall containing the videos of national team members describing key national findings was developed for the website.

- The short report *Children's changing online experiences in a longitudinal perspective* was published.
- The short report *Online on the mobile: Internet use on smartphones and associated risks among youth in Europe* was published.
- The short report *Experiences with sexual content: What we know from the research so far* was published.
- The short report *Testing the reliability of scales on parental internet mediation* was published.
- The national report *Kids Online – Safety and risks: Full findings from a children survey of 9-16 year olds in Latvia* based on the EU Kids Online survey in Latvia was published.
- The interactive final report was made available on the website.
- The final annual report, D1.5C, was submitted to the EC.

2.3 Report on activities by work package

WP1: Project management and evaluation

As planned in the original proposal, the coordinator undertook the following in order to ensure effective delivery of the WPs:

- Managed the network coordination.
- Monitored and managed the budget.
- Organised the 3rd and 4th network workshops.
- Managed the redesign of the online data repository, relabelled the European Evidence Database, to support the work of WP2.
- Managed the design and continual updating of the project website as the public face of EU Kids Online.
- Renewed and continually updated the contacts list for project dissemination.
- Liaised with the EC Safer Internet Programme.
- Produced several short reports and, in particular, the final report.
- Supported and participated in the conduct of the multinational qualitative research (WP4).
- Supported the dissemination of all reports.
- Wrote and distributed frequent newsletters to over 3,000 stakeholder contacts.
- Liaised with and presented at a series of international bodies and events (FOSI, CEO Coalition, ICT Coalition, Council of Europe, European Commission, etc.).
- Responded to a sustained series of ad hoc requests for research and/or policy input from a substantial range of stakeholders internationally.
- Advised researchers internationally who wished to undertake similar/related research.
- Sent out EU Kids Online reports and other documents to conferences and meetings (e.g. Safer Internet Forum).
- Evaluated progress continually and adjusted the management and collaboration strategy accordingly.
- Supported ad hoc funding bids to external bodies by network members.
- Negotiated the handover of the network coordination to the Hans-Bredow Institute, University of Hamburg, from November 2014.

WP2: European Evidence Database

In the last six-month period, WP2 activities have focused on the revised version of the 2010 survey on children's online experiences as well as finishing the last update of the European Evidence Database. In October 2014 the final version of all WP2 deliverables was available on the project website (www.eukidsonline.net) and consisted of the following:

- An updated and enlarged publicly accessible database of more than 1,500 studies where stakeholders can search not only for research sources, but also for summaries of findings for many of the more recent studies (those conducted since 2009). See www.lse.ac.uk/media@lse/research/EUKidsOnline/DB/home.aspx
- An updated review on the nature of the evidence base, noting recent trends, specific advances in knowledge and/or methods and remaining research gaps. See Ólafsson, K., Livingstone, S. and Haddon, L. (2014). *Children's use of online technologies in Europe: A review of the European evidence base. Revised edition.* London: EU Kids Online, LSE.
- Answers to Frequently Asked Questions, up-to-date and easily used, to guide methodological good practice. See Ólafsson, K., Livingstone, S. and Haddon, L. (2013). *How to research children and online technologies? Frequently asked questions and best practice.* London: EU Kids Online, LSE.

As part of the research toolkit (along with the Frequently Asked Questions) the network has added to the list of WP2 deliverables a revised edition of the 2010 survey on children's online experiences. This takes into account developments in the research field since the design of that survey, and acts as a guide for those who wish to build on that survey for their own research.

WP3: Hypotheses and comparisons

The objectives of WP3 were:

- To test a series of hypotheses (theory-led and policy-led) and conduct comparisons (e.g. to explore regional groupings) in the EU Kids Online II dataset, resulting in short reports and full articles.
- To develop and report on bilateral and multi-country comparisons of European findings and those from directly parallel projects (e.g. in Russia) or similar projects (e.g. in the USA), in order to understand better online risks.
- To develop and report on longitudinal comparisons of EU Kids Online findings and those from previous surveys (e.g. SAFT, Eurobarometer), to understand better time trends and changes.

In order to fulfil these objectives the network was continuously working on the following tasks:

- 1) *Identify relevant research questions:*
 - Assess stakeholder feedback to identify new questions to be addressed.
 - Review new research from EU countries as identified in WP2.
- 2) *Analyse the EU Kids Online II dataset:*
 - Conduct statistical analyses and write reports on results regarding
 - the changing risk environment;
 - strategies of safety mediation.
- 3) *Relate EU Kids Online findings to broader contexts:*

- Compare EU Kids Online II findings with other countries, as identified through WP2 and entered in the EU Kids Online III online database (bilateral and multi-national comparisons).
- Compare EU Kids Online findings with data from previous surveys (longitudinal comparisons).

These are the achievements of the WP3 activities:

- Annex 9 provides an overview of all analyses that have been conducted with the EU Kids Online dataset so far. These go beyond the reports D4, D5 and D6 of the previous EU Kids Online II project as well as the chapters of the final book of that project. Since 15 reports have been published so far, the objectives as outlined in the project proposal have been surpassed. In addition, a number of reports are still being prepared.
- Regarding comparisons with other countries, a special report on findings from Brazil in comparison with European findings (see Report No. 9) as well as an upcoming report on findings from Russia (see Report No. 16) have both shown interesting similarities but also substantial differences that emphasise the role of the societal and cultural context.
- As the development of online media continues rapidly, new data from other studies are increasingly important. Due to the fact that mobile communication has substantially increased since 2010, one report has compared EU Kids Online 2010 data on mobile use with recent findings from the *Net Children Go Mobile* project (see Report No. 13).
- As regards developments over time, the network has discussed a conceptual approach to analysing longitudinal trends in online behaviours and experiences. This approach has been published in a short report in October 2014 (see Report No. 12). Further reports that compare the 2010 EU Kids Online data with 2013/14 Net Children Go Mobile data will be published in November.

WP4: Meanings of risks for children

At the start of the project the work on WP4 was divided into two work groups:

- The satellite research group's task will be the collection of studies carried out among EU Kids Online members involving qualitative research with a focus on innovative methods. This research group will work on the report D4.1 *Innovative methods for investigating how children understand risk in new media* (T22).
- The comparative research group's task will be to carry out the comparative research across countries, with a common methodology, focusing on the meanings of online risks for children. This research group will work on the report D4.2, *Understanding the meaning of risks for European children* (T30).

Satellite research group

- The research group discussed studies that have been carried out recently in the following countries: Australia, Austria, Belgium, the Czech Republic, Estonia, Finland, Germany, Greece, Italy, Norway, Russia, Slovakia, Spain and the UK
- National contacts from those countries (a) discussed what counts as innovative methods and how we can define and/or describe such methods, and (b) wrote up previously unpublished case studies.
- The report *Innovative approaches for investigating how children understand risk in new media: Dealing with methodological and ethical challenges* (119 pages) was delivered by the satellite research group in September. Fifteen researchers from 11 countries (Australia, Belgium, the Czech Republic, Greece, Hungary, Italy, Malta, Portugal, Romania, Spain and the UK) contributed to writing this report.

Comparative research group

- The research goals were formulated in following way:
 - What do children perceive as being potentially negative or problematic when using the internet?
 - What impacts and consequences can such negative experiences have?
 - How do they evaluate things that adults consider potentially problematic?
 - What do children do to avoid these problematic experiences?
 - What can children do after having such negative experiences?
 - What coping strategies work best from children's perspectives?
- Pilot focus groups and interviews took place in November and December 2012. Coding and the coding manual were discussed at the meeting in Prague in January 2013.
- The following 11 European countries collected data from March to September: the Czech Republic, Romania (in Romanian and Hungarian), Hungary, Turkey, Greece, Belgium (in Dutch), Italy, Malta, Spain, the UK, Portugal. A parallel project was undertaken in Australia.
- Every country carried out research with a minimum of six focus groups and conducted a minimum of 12 face-to-face interviews. Focus groups were single gender, which meant that three focus groups were with boys and three were with girls, aged 9-10, 11-13, and 14-16. Data collection took place in schools. The interview transcripts were subsequently coded.
- In September and October 2013, the Czech team worked on transferring the first level of national coding to Excel files. The system of content analyses of codes was developed to sort the huge amount of data and to help in the next steps of analyses. Various research teams were also created to analyse different research themes across the data.
- In November and December 2013, the Czech team prepared the second level of coding, which was focused on sorting the huge amount of material by dividing first-level codes into various thematic areas. In summary, 26,696 lines was coded and divided into the following sections: research area, problematic situation, platform, actors and feelings.
- In November and December 2013, national teams selected and (if relevant) translated interesting sections of focus groups and interviews. In summary, sections were translated into English across countries.
- In January 2014, all the materials were transferred into and interconnected in Excel and NVivo files (software for analyses of qualitative data), and the researchers started to work with both data files.
- From January to April 2014, the researchers worked on articles for the special issue 'Children, youths and internet: Qualitative perspectives' of the journal *Communications: The European Journal of Communication Research*. In April, the special issue was accepted and will consist of three articles based on the EU Kids Online III data (from Sonia Livingstone, Monica Barbovschi and David Smahel).
- From January to April 2014, researchers from many countries worked on the final report of WP4.
- This report, *The meaning of online problematic situations for children: Results of cross-cultural qualitative investigation in nine European countries*, was published in early May.
- From May to June, researchers worked on publishing results from the qualitative investigation.
- The article 'Media representations and children's discourses on online risks: findings from qualitative research in nine European countries' (G. Mascheroni, A. Jorge and L. Farrugia) from WP4 data was published in June in the journal *Cyberpsychology: Journal of Psychosocial Research on Cyberspace*.
- A special issue of the journal *Communications* was published in October, including four articles from WP4 data: (1) 'Ways to avoid problematic situations and negative experiences: children's preventive measures online' (S. Vandoninck and L. d'Haenens),

(2) 'Classification of online problematic situations in the context of youths' development' (D. Smahel, M.F. Wright and M. Cernikova), (3) 'Developing social media literacy: how children learn to interpret risky opportunities on social network sites' (S. Livingstone), and (4) 'Dealing with the misuse of personal information online – coping measures of children in the EU Kids Online III project' (M. Barbovschi).

WP5: Dissemination of project results

- There was a regular clarification/reminder of WP5 work targets for national teams, specifically:
 - Ensuring that new people sign up for the EU Kids Online contact list.
 - Promoting EU Kids Online through the social media Facebook and Twitter (@eukidsonline).
 - Promoting the EU Kids Online newsletter whenever and wherever relevant.
 - Each national team undertook to present the EU Kids Online project and/or project results at a minimum of four events.
 - Each national team undertook to ensure that the national media mentioned EU Kids Online through frequent interaction with and response to journalists.
 - Each national team undertook to document outputs.
- To meet the internal information needs of network members, a shared system was used involving (1) regular coordinator updates by email; (2) a portal for documentation and discussions in WPs; and (3) an internal Facebook group for network members' informal information and discussions.
- There was coordination with other WPs as regards sending out press releases whenever relevant (e.g. when short reports were published).
- The WP5 work for this period included the production of a final report from the project, including short interviews with network members from all national teams (published on YouTube in English and in national languages).
- WP5 has also worked on ensuring the sustainability of EU Kids Online's work after the project ends. Specifically, the format and future of the overall project web page, as well as the national pages, were discussed. Agreement was reached within the network to continue updates on social media accounts after the project period has ended.
- WP5 also coordinated the dissemination of the final policy report from the network as well as the final report.
- The Facebook page was developed further as a dissemination and consultation tool. The primary mission of the Facebook page is for updates when there are new research findings or reports. The EU Kids Online Facebook page went public on 27 March 2012. The page focuses on research findings and facts, and is therefore not active in disseminating practical advice to stakeholders and users outside the research and policy field. Regarding the Facebook page:
 - A total of 1,229 people have 'liked' us (70% women and 30% men), and therefore get our postings on their own walls.
 - The largest age group among our fans continues to be the 25- to 34-year-olds (27%), the lowest the 13- to 17-year-olds (0.2%), and those aged 65+ (2%).
 - We have Facebook friends from 47 different countries around the world.
 - Our most popular post for the past year was the release of our final policy report from 2 September 2014 seen by 1,148 people. This was also our most shared story.
- A Twitter account for the project was set up (@eukidsonline). Our Twitter account has so far posted 334 Tweets, and has increased its followers in this period to 1,452.

- The national pages were updated and more references and examples of national outputs were added to make the national pages more useful as resources (see below).
- See Annex 10 for details of web statistics and report downloads.
- See Annex 11 for dissemination statistics and a list of outputs.

Example of the new style of national webpage

In brief

Due to national policies, children in Portugal have had widespread internet access at school between 2009 and 2011. At home, these policies promoted laptop ownership and made children's internet access via the family desktop less common. This private access and use challenges parental mediation. Having a level of internet use below the European average, Portuguese parents combine active and restrictive mediation. Children self-reported risk and harm are relatively low, while there is still room for exploring skills and opportunities.

Highlights

- The Portuguese findings have informed initiatives of the [Portuguese Consortium for Internet Safety \(Internet Segura\)](#), which coordinates national activities.
- Based on the national results of the EU Kids Online survey, an edited book was published in 2012, *Crianças e Internet em Portugal* (MinervaCoimbra, 2012). The book combines analyses and comments from stakeholders and academics.
- The EU Kids Online outputs and reports have been broadly disseminated in the media; the team is called upon regularly to comment on issues regarding children and the internet, to talk at schools, libraries and town councils.
- A national training course for the network of school librarians was designed and implemented in 2014, in Lisbon and Oporto. Thirty participants concluded the training course.
- The Portuguese team has acted as a consultant for the Brazilian survey TIC Kids Online, conducted by [Cetic](#) and based on the EU Kids Online methodology.
- In 2013, the Portuguese Foundation for Science and Technology funded an updated survey through the [Net Children Go Mobile](#) project.

Portuguese team

Cristina Ponte is Associate Professor at the Faculty of Social Sciences and Humanities, New University of Lisbon. A member of the Steering Committee in the COST Action IS0906 on Audiences (2010-2014), she coordinated the international project *Digital Inclusion and Participation* (2009-2011) and the national project *Children and Young People in the news* (2005-2007). Currently she is vice-chair of the TWG Children, Youth and Media, European Communication Research and Education Association. Areas of expertise: children and media; media and generations; digital divides; journalism studies, media discourse.

José Alberto Simões, PhD, is an Assistant Professor at the Faculty of Social Sciences and Humanities, New University of Lisbon. He is also a researcher at CESNova. His main research areas include Sociology of Culture, Youth Cultures, Communication and Media Studies. He is currently coordinating the national project *Networked Youth Activism* and Portuguese participation in the international project *Net Children Go Mobile*. Areas of expertise: digital divides, internet use, qualitative methods, quantitative methods, teenagers/youth.

Ana Jorge holds a PhD on Communication Sciences, studying young people's relationship with celebrity culture, and is currently a postdoctoral researcher. Her main research interests are media education, popular culture and consumption, gender and reception. She has been member of research projects on women's representation in newspapers and magazines, and on digital inclusion and participation.

Daniel Cardoso is a PhD student of Communication Sciences at the New University of Lisbon, and an Assistant Professor at the Lusophone University, in Lisbon. His PhD focuses on the sexualized usages of the new media by Portuguese children; whereas his Masters' thesis was on online expressions of polyamory. He has participated in several publicly funded national research projects, namely relating to women's representation in magazines and on online fora.

Rosa Martins, PhD, has been working at the Directorate of the Portuguese Ministry of Education's School Libraries Network. She

WP6: Policy recommendations

Main activities

- WP6 monitored policy at the European and international level, and makes contributions on behalf of the network to relevant public debates and discussions based on research produced by the network. Contributions include publications, short reports, stakeholder presentations and public fora on policy.
- One of the principal outputs for WP6 (D6.1), the edited collection *Towards a better internet for children: Policy pillars, players and paradoxes*, was published by Nordicom in December 2013. The collection contains 15 chapters on a range of themes related to policy development in internet safety. It takes a wide perspective on policy formation at a European level, and discusses how over 15 years a consensus on key themes has emerged. Featuring contributions from across the network, the book contains discussions on the principal policy innovations, examines practice and implementation, and assesses some of the emerging challenges as well as enduring paradoxes of the field.
- D6.2 was completed in August 2013 following the network meeting in Leuven, and comprised the submission on behalf of the network to the consultation on the Green Paper on convergence.
- D6.3 was the next main focus of activity for this WP in the period under review. This report combines and deepens the analyses of cross-national differences in European internet safety implementation from sources employing two distinctive approaches (a top-down and bottom-up approach). Drawing on indicators and data collected for the EC as part of its benchmarking study (Idate, Technopolis 2013), the report seeks to highlight where policy frameworks and initiatives coincide with particular configurations of internet use, risk and mediation, and thereby aid understanding of which policy developments contribute to better outcomes.
- D6.3 was the subject of a network discussion at WP5 in Reykjavik. Preliminary findings from the analysis of the benchmarking study were presented. Findings were discussed and further refined. D6.3 was published to coincide with the FOSI European Research Forum held in Microsoft EMEA Headquarters, Paris, in May.
- D6.4 *Final recommendations for policy* updated the policy advice and recommendations of the EU Kids Online network. It built on previous policy reports, and added to recommendations on policy implementation, further research and methodological lessons learned contained in the output from the network. The report offered specific, research-based recommendations addressed to individual sectors and stakeholders intended to be of practical use to national policy-makers. The report was launched in September 2014 to coincide with the Internet Governance Forum in Istanbul.
- A further output D6.5 was planned as a special themed issue of a journal addressing policy debates, as featured in EU Kids Online reports, framed in an international context. This work is held over as a task for the next phase of EU Kids Online, and will continue to draw together policy debates at the national, European and international levels.

Other activities

- Brian O'Neill was appointed by the Irish Minister for Communications, Pat Rabbitte TD, to chair Ireland's Internet Content Governance Advisory Group. The group's remit includes examining appropriate regulatory, legislative and policy responses to issues of cyberbullying and harassment and age-inappropriate content. The group is also to advise the Minister on the kinds of safeguards that should exist and the appropriate relationship between the state, civil society and internet service providers in light of pervasive internet access and concerns for better internet safety. The group reported in May 2014.
- A presentation comparing the initial findings from the Net Children Go Mobile project with EU Kids Online findings was given by Brian O'Neill at FOSI's annual conference in Washington DC in November 2013. Also appearing on the panel 'What's new in research' was Amanda Lenhart of Pew Internet and Justin Patchin, leading author on cyberbullying.
- Brian O'Neill gave a presentation on 'Youth, privacy and social media: Findings from EU Kids Online' at the 5th edition of CPDP (Computer Privacy and Data Protection) in Brussels in January 2014.

- Sonia Livingstone and Brian O'Neill contributed a chapter, 'Children's rights online: Challenges, dilemmas and emerging directions', to the volume *Minding minors wandering the web: Regulating online child safety*, edited by Simone van der Hof and published by Springer.
- Brian O'Neill also published an article, 'Who cares? Practical ethics and the problem of underage users on social networking sites', in the journal *Ethics and Information Technology* (vol 15, no 4).
- EU Kids Online was represented at the annual review meeting of the CEO Coalition in January 2014 in Brussels. The network has been an observer at each of the meetings of the CEO Coalition, and has made contributions to individual working groups as well as having published the short report, *Towards a better internet for children*, in June 2012.
- Brian O'Neill, as independent assessor for the ICT Coalition, presented the findings of the first review of the implementation of the ICT Principles at the ICT Coalition Stakeholder Forum in Brussels in April 2014. The report of the review was published by the end of April on the ICT Coalition's website (www.ictcoalition.eu).
- EU Kids Online also contributed to a series of workshops convened by the consultants to the EC for its benchmarking study of European regulatory policies and structures. Workshops held in Brussels in October 2013 and May 2014 examined the main policy indicators and mapping tools developed for the analysis of internet safety policy and implementation in European countries. The network's own report, D6.3, builds on this work, and has been sent to the EC for review.
- The EU Kids Online network contributed to a workshop convened by the UN Special Rapporteur, Frank La Rue, in preparation for a report submitted to the UN General Assembly in October 2014. The report dealing with the rights of freedom of expression as it applies to young people and the internet was the last report of Frank La Rue's mandate, prior to a new appointee taking office in 2014.
- The network made a submission to the Day of General Discussion organised by the UN Special Committee on the Rights of the Child in Geneva in September. It dealt with the twin themes of children's equal and safe access to digital media and ICT and children's empowerment and engagement through digital media and ICT. Sonia Livingstone was keynote speaker.
- Copies of the publication *Towards a better internet for children: Policy pillars, players and paradoxes* were distributed to 50 key stakeholders around the world in leading positions in government, industry and civil society, with a further 50 copies distributed at the 2014 Safer Internet Forum.

3. Evaluation of success indicators

Indicators	Progress	
	Expected by end of third year	Actual progress by end of third year
Numbers of visits to the website	200,000	188,776
Number of people on the contact list	1,000	3,593
Number of entries in the European evidence database	700	1,500+
Number of academic/public/stakeholder presentations	80	782
Number of media reports referring to the project	200	1,261
Number of short report copies emailed or downloaded	400	21,302
Number of EU Kids Online final report (hard) copies distributed internationally	3,000	Online interactive report
Number of 'friends'/'followers' on social networking sites	400	2,681
% of teams that held national stakeholder liaison meetings	100%	100%

Detailed progress is as follows:

- Number of visits to the website: Estimated 188,776 (Note: before release of final report, and promotion continues; see Annex 10).
- Number of people on the contact list (with emails): 3,593
- Number of entries in the European evidence database: 1,500+.
- Number of academic publications (289), academic presentations (263) and public/stakeholder presentations (230): 782 (see Annex 10).
- Number of media reports referring to the project: 1,261 (see Annex 10).
- Number of short report copies emailed or downloaded: 21,302 (calculated by end October 2014).
- Number of final report copies distributed internationally: instead of producing hard copies, a decision was made to produce an online interactive final report. These were included in the goody bag for all delegates to the 2014 Safer Internet Forum in Brussels and all delegates at the 2014 FOSI Annual Conference in Washington DC. In all, 5,000 copies were printed, and a batch was sent to each of the 33 national contacts for distribution at upcoming events and to stakeholders.
- Number of 'friends'/'followers' on social networking services: $1,229 + 1,452 = 2,681$
- % of teams that held national stakeholder liaison meetings: this task was left to network members to arrange as appropriate within their country. Some held formal meetings, while some liaised with stakeholders as and when occasion arose at national policy events. All sustained contact with national stakeholders in one way or another.

AP – International Advisory Panel

Annex 3: 5th workshop, Reykjavik, Agenda

Host institution: University of Iceland and University of Akureyri
17-18 January 2014

Network members' advance preparation for the 5th workshop:

- Prepare presentation of national findings for the video session.
- Identify possible new short report(s) or other public outputs that national teams could contribute to.
- Update coding and summaries of national studies in the European Evidence Database
- Ensure you remain periodically in touch with national stakeholders so that you know their evidence needs.
- Review your national web page (at www.eukidsonline.net) ready for a discussion of final changes.

Time	Who leads	Agenda		Outcome		
9.00		Arrive (Lögberg, room 102)				
9.10-9.25	Sonia and Leslie	Welcome and short progress review of the project		Everyone is prepared for the workshop ahead		
9.25-9.30	Jon	Outline of the plans for videoing		Everyone knows what to expect as regards videoing		
9.30-11.00	David and Uwe	WP4: Explanation of coding, data, usage	WP3: Upcoming reports	Planning further work packages		
11.00-11.30	Tea/Coffee					
11.30-1.00	David and Uwe	WP4: Presentation of results for the special issue of <i>Communications</i>	WP3: New reports	Planning further work packages		
1.00-2.00	Lunch					
2.00-2.30	Þórbjörn	Children's media use: The long-term perspective		Understanding a major Icelandic research project		
2.30-2.50	Uwe	Challenges of longitudinal research: Lessons learnt		Understanding the related longitudinal issues		
2.50-3.10	Sonia	Cross-cultural studies: Lessons learnt		Understanding the related cross-cultural issues		
3.10-3.40	Giovanna, David, Lelia	Responding to the challenges		Discussion of issues		
3.40-4.00	Ellen moderates	General discussion in plenary		Discussion of issues		
4.00-5.00	Reception					
7.00	Dinner in Reykjavik (at Hotel Arnarhvoll)					

Saturday 18 January

Time	Who leads	Agenda		Outcome
9.00	Arrive (Oddi, room 201)			
9.00-10.30	David and Brian	WP4: Working together in teams on data	WP6: D6.5, special journal issue	Planning further work packages
10.30-11.00	Coffee			
11.00-12.00	David and Brian	WP4: Cross-cultural aspects of the data	WP6: D6.4, Cross- European comparative analysis	Planning further work packages
12.00-1.00	Lunch			
1.00-2.30	David and Kjartan	WP4: Plans for work and dissemination	WP2 Survey revision proposal	Planning further work packages
2.30-3.00	Brian	WP6 plenary: Policy influences and country clusters		
3.00-3.30	Elizabeth	WP5 plenary: Website and end events		
3.30-4.00	Coffee			
4.00-4.10	Kjartan	Report back, next steps for WP2		
4.10-4.20	Uwe	Report back, next steps for WP3		
4.20-4.30	David	Report back, next steps for WP4		
4.30-4.40	Elisabeth	Next steps for WP5		
4.40-4.50	Brian	Report back, next steps for WP6		
4.50-5.00	Sonia and Leslie	General review and forward planning		All ready for next steps
5.00-6.30	Management Group meeting	Writing subgroups (especially for WP3 or WP4) can meet and work		
6.30	Coach for dinner outside Reykjavik	The coach stops first at the hotel and then at the university

Šmahel	David	Masaryk University, Brno	Czech Republic	18 January 2014

Annex 6: 6th workshop, Milan, Agenda

Host: Università Cattolica del S. Cuore, Milan, 19-21 June 2014

Network members' advance preparation for 6th workshop:

- Prepare a 2-minute talk (no PowerPoint please, just be ready to speak in the meeting) about the highlights of the EU Kids Online project from your national academic and/or policy perspective.

Thursday 19 June

Time	Who leads	Agenda		Outcome
9.00		Arrive		
9.15-9.30	Sonia and Leslie	Welcome and short progress review of the project		Everyone is prepared for the workshop ahead
9.30-10.00	Kjartan	Updated report on the database		Final report on European evidence database
10.00-10.45	David and Leslie	Qualitative results from EU Kids Online and Net Children Go Mobile		Network hears about the qualitative studies
10.45-11.15	Coffee			
11.15-12.00	Michael	Discussant replies and general discussion regarding the new qualitative findings		Evaluation of the qualitative findings
12.00-1.00	Parallel sessions	WP4: David chairs: Plan publications	WP3: Uwe chairs: Discuss short reports	Reporting and publication decisions for WP4 and WP3
1.00-2.00	Lunch			
2.00-2.30	Uwe	WP3: plenary presentation on the longitudinal findings: changes in children's digital experiences		Finalise the report on longitudinal analysis
2.30-3.30	Parallel sessions	Stéphane chairs: Developing new researching with very young children	WP6: Brian chairs: Updated policy recommendations for the project	Exploring potential research on very young children Final decisions on policy commendations for WP6
3.30-4.00	Coffee			
4.00-4.45	Stéphane	Plenary presentation (see abstract): ICT innovation – emerging threats and opportunities for children		Exploring future trends in the digital landscape as they may affect children
4.45-5.30	Janice	Discussant replies and general discussion		Identify future research needs linked to the changing digital landscape

Friday 20 June

Time	Who leads	Agenda		Outcome
9.00	Arrive			
9.15-10.00	Janis	The evolving research agenda – rethinking concepts of risk and safety		Reflections on the risk framework
10.00-10.45	Elisabeth	Discussant replies and general discussion		Discussion to take the research agenda forwards
10.45-11.15	Coffee			
11.15-12.30	Parallel sessions	WP4 Qualitative toolkit: David and Leslie chair	WP2 Quantitative toolkit: Kjartan chairs	Redevelopment of the 'Methods' page of the website, to make research tools available for future researchers
12.30-1.30	Lunch			
1.30-2.00	Brian	Presentation of the main policy recommendations of EU Kids Online		Finalise recommendations for the final report
2.00-2.45	Uwe	Planning future research initiatives and collaborations: meet in small groups to discuss themes from research proposals that are in development		Feedback for proposers and exploration of potential collaboration
2.45-3.30	Uwe	Taking forward the revised plans for the EU Kids Online Network		Future possible research and collaboration
3.30-4.00	Coffee			
4.00-5.30	Lelia	Show and tell: national teams give 2-3 minute accounts of highlights – important results and key project research/policy outcomes		Developing the highlights of the project, for the website and final report
5.30-6.00	Sonia and Leslie	Final report, last steps, general review		All ready for last steps

Saturday

Management Group meeting

Writing subgroups (especially for WP3 or WP4) can meet and work

11)	Children's online experiences in socially disadvantaged families: European evidence and policy recommendations	Ingrid Paus-Hasebrink, Philip Sinner, Fabian Prochazka	July 2014
12)	Children's changing online experiences in a longitudinal perspective	Uwe Hasebrink	Oct 2014
13)	Online on the mobile: Internet use on smartphones and associated risks among youth in Europe	Gitte Stald, Lelia Green, Monica Barbowski, Leslie Haddon, Giovanna Mascheroni, Bence Ságvári, Barbara Scifo, Liza Tsaliki	Oct 2014
14)	Testing the reliability of scales on parental internet mediation	Andrea Dürager, Nathalie Sonck	Oct 2014
15)	Experiences with sexual content: What we know from the research so far	Liza Tsaliki, Despina Chronaki	Oct 2014

Annex 10: EU Kids Online website and downloads

Google Analytics shows that for the year covered by this report, from 1 November 2013 to 28 October 2014, there were 76,462 visits to the website (www.eukidsonline.net). Over the course of the three years of the project, LSE changed its way of measuring visits, moving from its own system to Google Analytics. Therefore the estimated total number of visits over the course of the project is 188,776.

The 'Reports' page was the second or third most visited page after the 'Home' page each month.

Also as before, other popular pages are those relating the Best practice guide's Frequently Asked Questions (FAQs) (from EU Kids Online I) – in the last year, 6 of the 10 most visited sites were FAQs. A number of EU Kids Online national teams do advise their students to use these FAQs as a methodological resource. The questionnaires (from EU Kids Online II) were on the ninth most popular page. In the last month, since it was launched online, the video wall of researchers from each team describing their own country rose to seventh place (400 visits).

Google Analytics also collects some information about visitors. The countries from which the greatest number originate is the UK (16,290), closely followed by the US, then Australia (probably reflecting the close ties with EU Kids Online), Italy, Spain, India, Ireland, Canada, Greece and Malaysia. It is unclear why India (1,765 visits) and Malaysia (1284 visits) have so many visitors.

Nearly all the reports from EU Kids Online have been moved to a more permanent location on ePrints (after posting reports there us a waiting period of about a week before they are sent to ePrints). In the first two years we had to estimate downloads, but the statistics from ePrints mean that in that period we severely underestimated these by assuming they were a proportion of visits to the website linked to the documents. In fact, in the last six months alone there were 11,233 downloads, bringing the current total to 21,302.

We can see the most popular downloads since we started putting documents into ePrints just over a year ago. This will favour the reports that have been available on ePrints for some time, but not the oldest ones that were downloaded from elsewhere before statistics were available. The most popular report by far was *Zero to eight: Young children and their internet use* (8,036 downloads). Second (surprisingly) was the Polish national report (3,688 downloads).

Of the main EU Kids Online reports, third was *Risks and safety on the internet: The perspective of European children: Full findings and policy implications from the EU Kids Online survey of 9-16 year olds and their parents in 25 countries* (2,127 downloads), fourth, *In their own words: What bothers children online?* (1,732 downloads), and fifth *Children's use of online technologies in Europe: A review of the European evidence base* (1,432 downloads). The only other national report to have been downloaded a considerable number of times was the French one (1,154 downloads).

Annex 11: Dissemination

Figure 1: EU Kids Online III, outputs by year

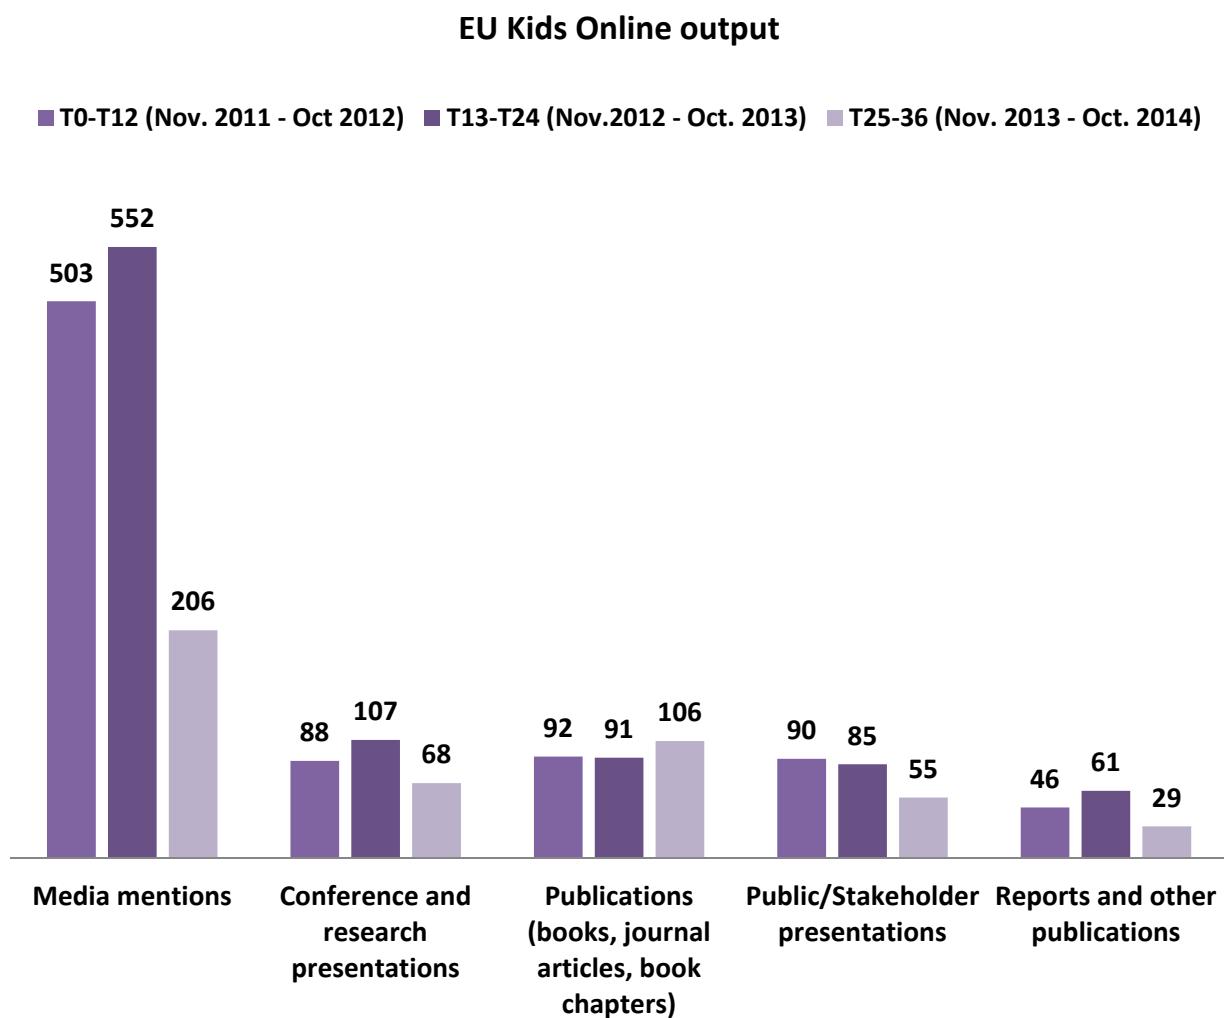

Figure 2: EU Kids Online III, total outputs by type of output

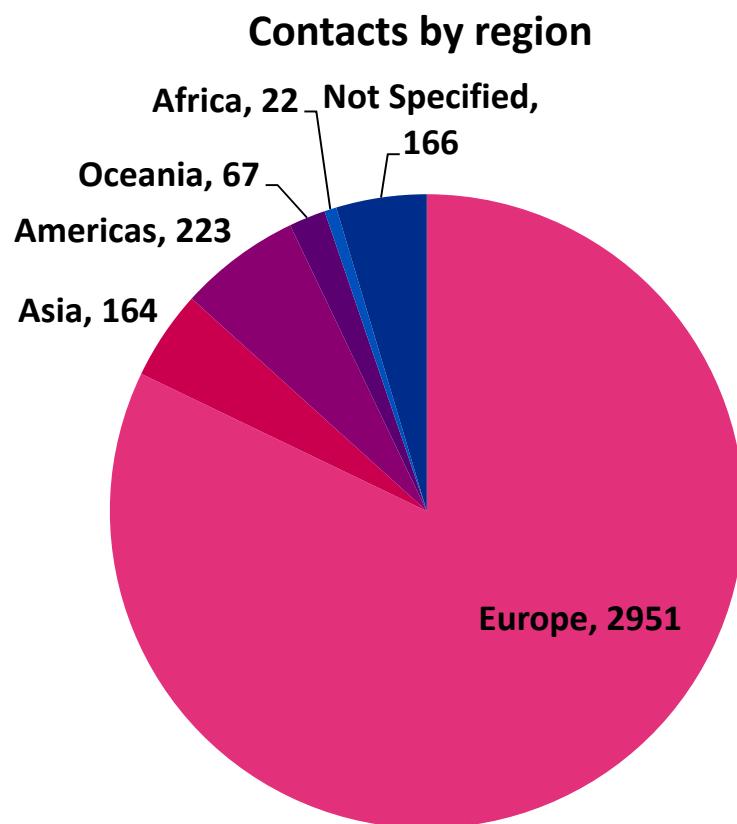

Figure 3: EU Kids Online contacts, by affiliation

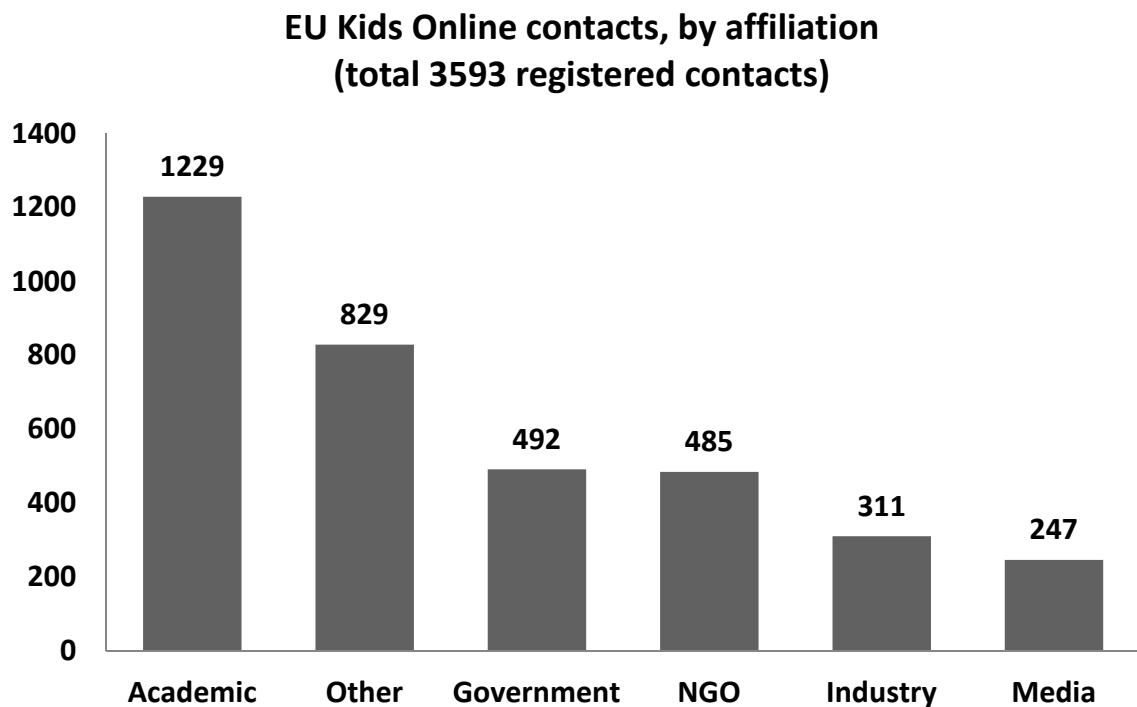

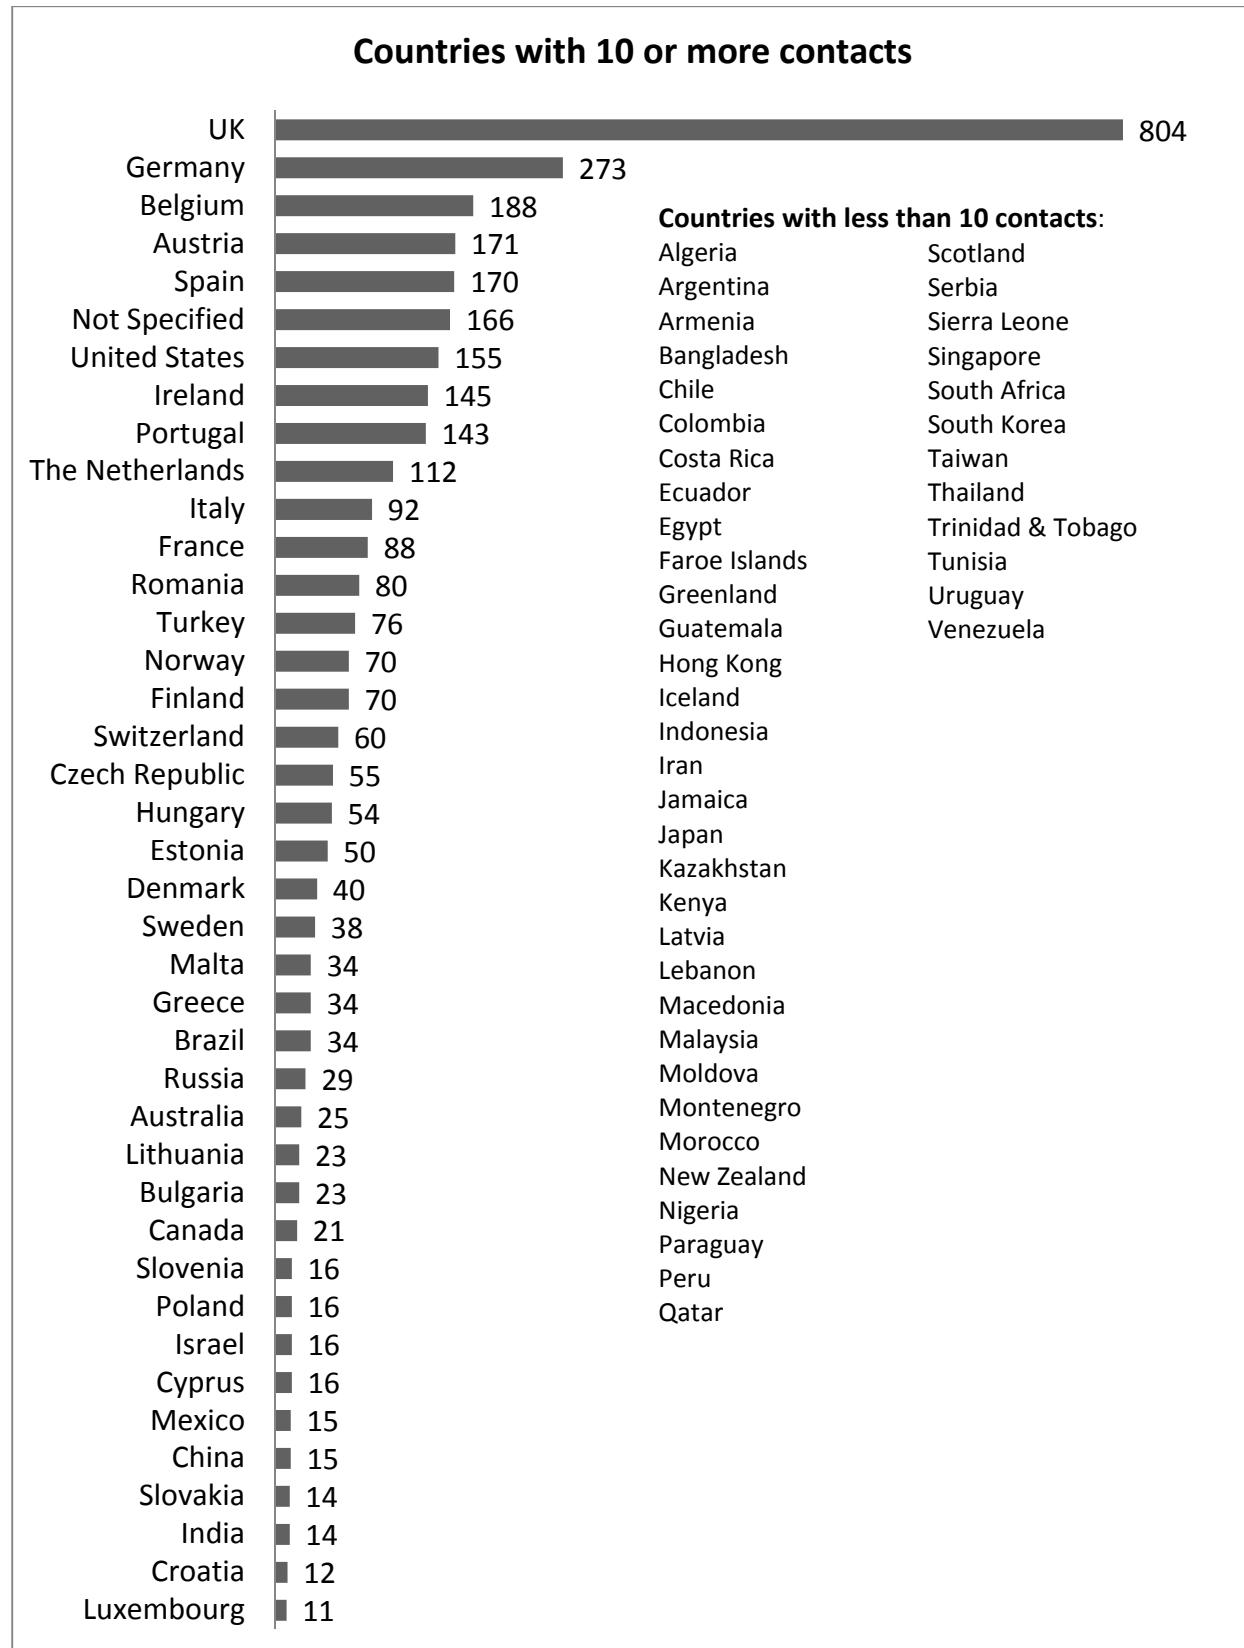

Figure 4: EU Kids Online contacts by country

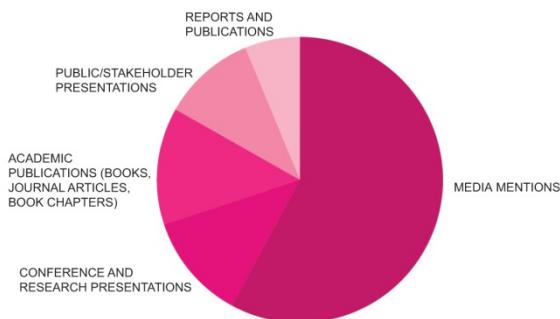

EU KIDS ONLINE DISSEMINATION FACTS

Output

Since November 2011 the EU Kids Online project has produced more than:

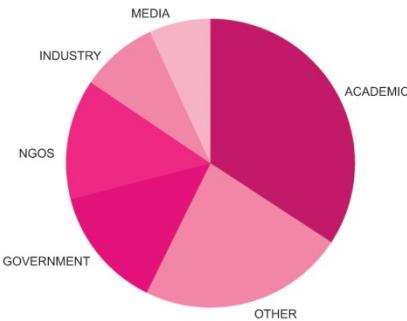

• Academic publications	289
• Reports and other publications	136
• Conference and research presentations	263
• Public/stakeholder presentations	230
• Media mentions	1261

Outreach

Our EU Kids Online updates reach 3,593 experts worldwide via the contact list. The affiliation spread is:

• Academic	1229
• Government	492
• NGOs	485
• Industry	311
• Media	247
• Other	829

Website

Throughout the project period, 189,000 visits were made to the project's website. A total of 21,302 document downloads were made from the site. The geographical spread in visitor origins is wide: The UK is at the top, with 16,290, followed by the US, then Australia, Italy, Spain, India, Ireland, Canada, Greece and Malaysia.
