

# Generation Brexit officially launches in six new languages

Today [Generation Brexit](#) officially launches in six new languages – German, French, Italian, Spanish, Polish and Greek. With our new language sections, the [Generation Brexit](#) project becomes the only pan-European Brexit project of its type.

We want to hear from YOU, in your language.

After you set up an account (top right side of the page), you can [either](#) come up with and post ideas to solve the challenges or you could vote on other people's ideas.

The ideas with the most votes will get turned into policy proposals and sent to key Brexit negotiators in London and Brussels.

**[Good Luck!](#)**
